Multi-Tab Product Slider

1. Go to Website -> Bizople Theme Configuration -> Multi Tab Product slider

The screenshot shows the Bizople Theme Configuration dashboard. At the top, there's a navigation bar with 'Website', 'Dashboard', 'Orders', 'Products', 'Blogs', 'Visitors', 'Reporting', 'Configuration', and user info ('Mitchell Admin'). Below the navigation is a 'Analytics' section with a 'GO TO WEBSITE' button. The main area features a chart titled 'SALES SINCE LAST WEEK' and a summary box with metrics like '\$7,201.18 Sold' and '66.67% Conversion'. On the right, a dropdown menu for 'Product Slider' is open, showing options: 'Product Slider', 'Multi Tab Product Slider' (which is highlighted with a red box), 'Category Slider', 'Blog Slider', 'Product Brand', 'Product Tabs', and 'Product Label'. The 'Multi Tab Product Slider' option is the target of the red box.

2. Click on "Create"
3. Now set the name of the slider, Sliding speed, No of Tabs and select the products for each tab.

The screenshot shows the 'Multi Tab Product Slider / New' configuration page. Key settings include:

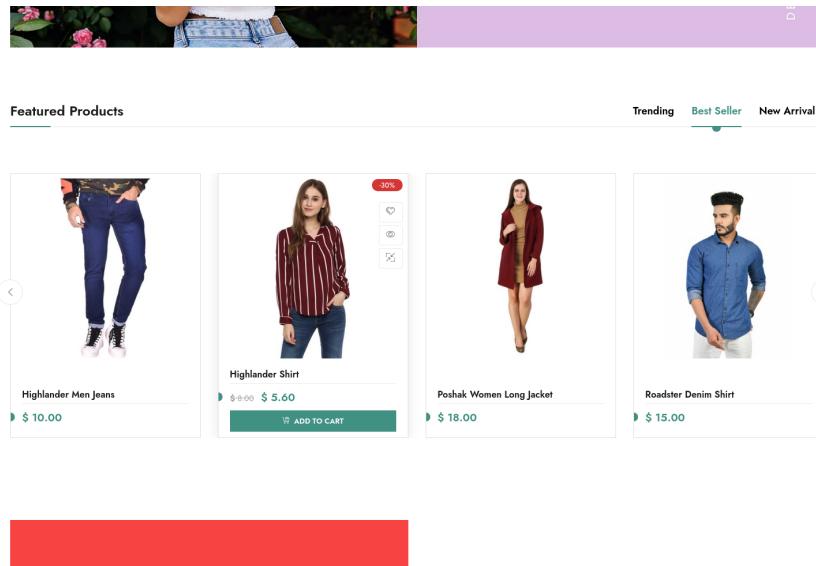

- Product Slider Name:** Featured Products
- No. of Tabs:** 3
- 1st Product Tab Data:** Trending (selected)
- 2nd Product Tab Data:** Best Seller
- 3rd Product Tab Data:** New Arrival
- Product sliding speed:** 6,000

The 'Add Tab and Products' section lists products under 'Trending': Conference Chair (CONFIG), Corner Desk Right Sit, Customizable Desk (CONFIG), Desk Combination, and Acoustic Bloc Screens.

4. Now go to page you want to add the multi tab product slider
5. Now click on "Edit"
6. Now drag and drop the Multi Tab Product slider snippet where you want to add it.
7. Select the name of the slider you created and click on "Add" and then click "Save"

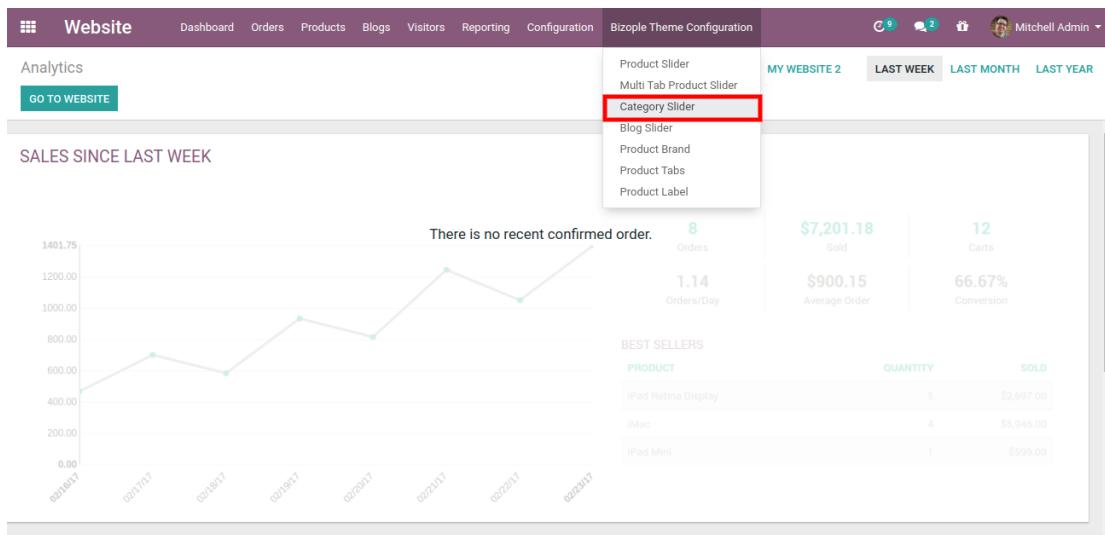

Note: In Edit mode Products will not be visible you need to save it first

8. You will see your multi tab product slider where you drag and droped it on the page.

Category Slider

1. Go to Website -> Bizople Theme Configuration -> Category slider

2. Click on “Create”

3. Now set the name of the slider and select the Category for that slider.

The screenshot shows the 'Category Slider / Shop By Categories' creation form. At the top, there's a header with 'Website', 'Dashboard', 'Orders', 'Products', 'Blogs', 'Visitors', 'Reporting', 'Configuration', and 'Bizoole Theme Configuration'. Below the header, it says 'Category Slider / Shop By Categories'. There are 'SAVE' and 'DISCARD' buttons. The main form area has a 'Slider name' field containing 'Shop By Categories' and a 'Collections of category' field containing a list of categories: Camera, Controller, Headphone, Laptop, Mobile, Speaker, and Watch. The bottom right corner shows '1 / 2 < >'.

4. Now go to page you want to add the Category slider

5. Now click on “Edit”

6. Now drag and drop the Category slider snippet where you want to add Category slider.

7. Select the name of the slider you created and click on “Add” and then click “Save”

Note: In Edit mode Products will not be visible you need to save it first

8. Your will see your Category slider where you drag and droped it on the page.

Shop By Category

Blog Slider

1. Go to Website -> Bizople Theme Configuration -> Blog slider

The screenshot shows the Bizople Theme Configuration interface. On the left, there's a navigation bar with 'Website' selected, followed by 'Dashboard', 'Orders', 'Products', 'Blogs', 'Visitors', 'Reporting', and 'Configuration'. Below this is a 'Analytics' section with a 'GO TO WEBSITE' button and a chart titled 'SALES SINCE LAST WEEK'. The chart shows sales figures from 02/18/21 to 02/23/21. To the right of the chart is a 'Bizople Theme Configuration' sidebar with options like 'Product Slider', 'Multi Tab Product Slider', 'Category Slider', and 'Blog Slider'. The 'Blog Slider' option is highlighted with a red box. At the bottom right of the dashboard, there are sections for 'BEST SELLERS' and some summary statistics.

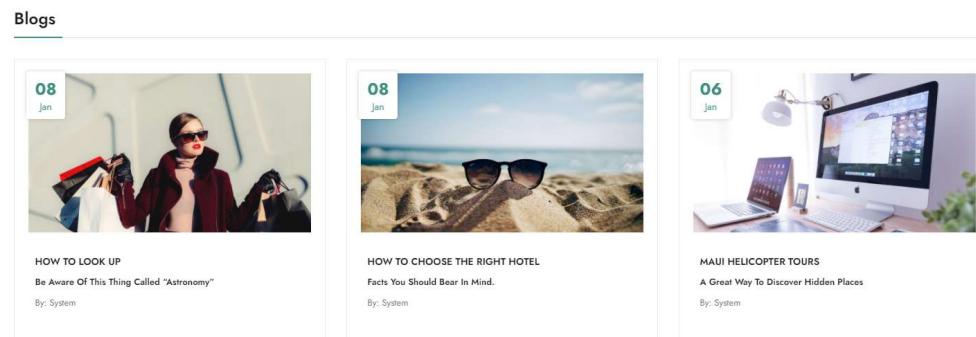

2. Click on "Create"
3. Now set the name of the slider, sliding speed and select the Blog for that slider.

The screenshot shows the configuration of a blog slider. The 'Slider name' is set to 'Latest Blog'. The 'Slider sub title' is 'Theme Estore Blogs'. The 'Auto Rotate Slider' checkbox is checked. The 'Slider sliding speed' is set to 5,000. The 'Blogs' dropdown contains a list of blog titles: Beyond The Eye, Buying A Telescope, What If They Let You Run The Hubble, How To Look Up, How to choose the right hotel, Maui helicopter tours, and Sierra Tarahumara.

4. Now go to page you want to add the Blog slider
5. Now click on "Edit"
6. Now drag and drop the Blog slider snippet where you want to add Blog slider.
7. Select the name of the slider you created and click on "Add" and then click "Save"

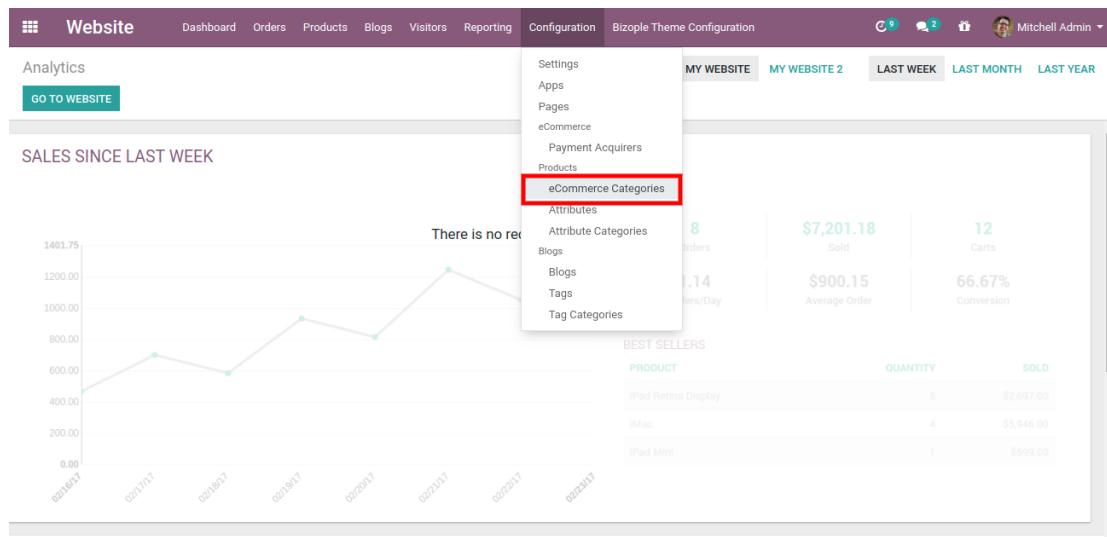

Note: In Edit mode Products will not be visible you need to save it first

8. Your will see your Blog slider where you drag and droped it on the page.

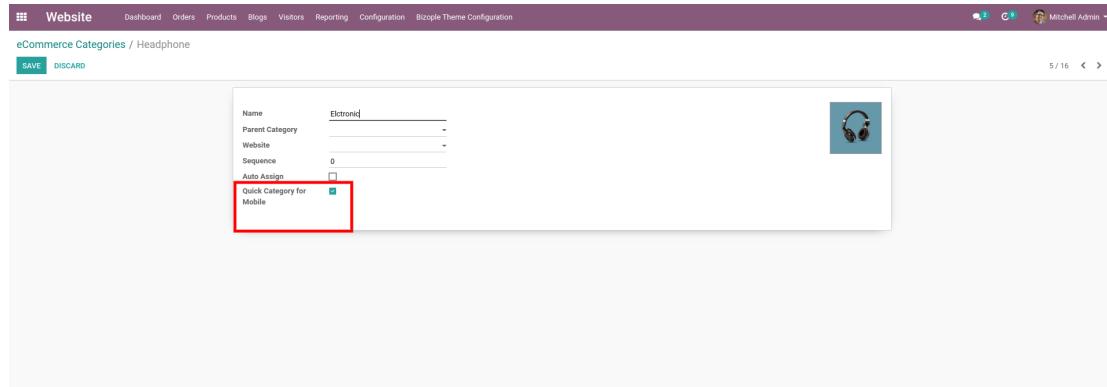

Special Category on Mobile

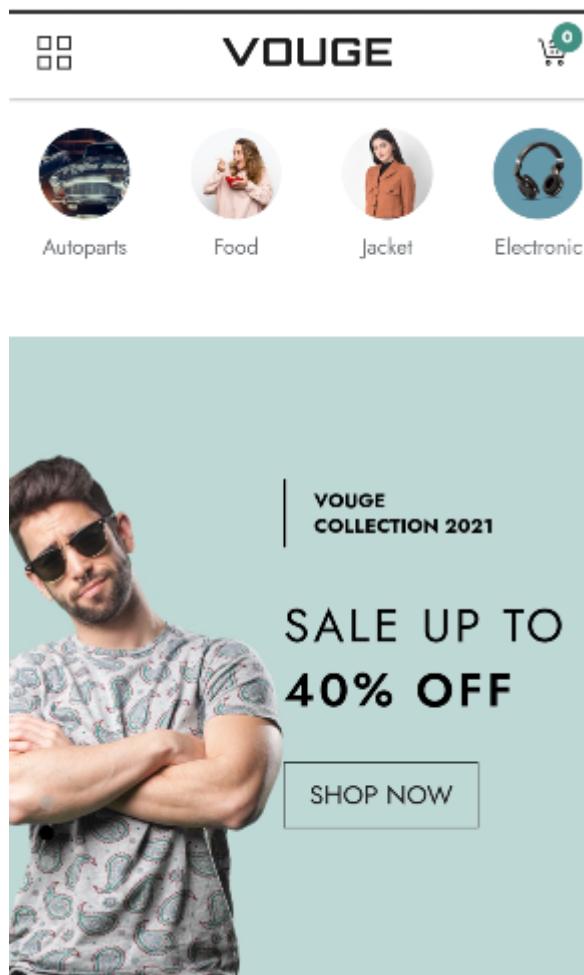

1. Go to Website -> Configuration -> eCommerce Categories

2. Select the category you want to display on mobile for quick access.
3. Now Click “Edit” and check mark the “Quick Category for Mobile”. **(For good visibility add the square image for that category)**

4. Now in mobile view you will see your Category Below Header

Auto Assign Category

1. Go to Website -> Configuration -> eCommerce Category

| PRODUCT | QUANTITY | SOLD |
|---------------------|----------|------------|
| iPad Retina Display | 5 | \$2,697.00 |
| IMac | 4 | \$5,946.00 |
| iPad Mini | 1 | \$599.00 |

2. Create New category

3. Set Name of the category and Tick Auto Assign (Set name for category like 'Sale' or 'Deals'** as this category will only have discounted products only)**

The screenshot shows the 'eCommerce Categories / Trending' page. In the 'Category' section, there is a form with fields for 'Name' (Trending), 'Parent Category' (dropdown), 'Website' (dropdown), 'Sequence' (0), and 'Auto Assign' (checkbox). The 'Auto Assign' checkbox is highlighted with a red box. Below it is a 'Quick Category for Mobile' checkbox.

4. Now Go to setting -> website

The screenshot shows the 'Settings' page with the 'Website' tab selected. On the left sidebar, the 'Website' option is highlighted with a red box. The main area shows the 'Website' configuration screen with sections for 'Website Title', 'Domain', 'Languages', and 'Customer Account'.

5. In pricing section enable “Discounts” and enable “Pricelist” and select “Advanced price rules” and save it.

The screenshot shows the 'Settings' page with the 'Website' tab selected. In the 'Pricing' section, the 'Discounts' and 'Pricelist' checkboxes are checked and highlighted with red boxes. The 'Pricelist' section also includes options for 'Multiple prices per product' and 'Advanced price rules'. Other sections like 'Shipping Address' and 'Shipping Costs' are also visible.

6. Again go to pricing section and click on “Pricelists”
7. Now Create a pricelist
8. Set Name of the Pricelist
9. Now Click on “Add a line”

| Applicable On | Min. Quantity | Price | Start Date | End Date |
|---|---------------|------------------------------------|------------|----------|
| Product: Customizable Desk (CONFIG) | 2 | 20.00 % discount and 0.0 surcharge | | |
| Product: Apple iPhone 11 (64GB) - White | 0 | 10.00 % discount | | |
| Product: Apple iPhone 11 (64GB) - Black | 0 | 20.00 % discount | | |
| Product: Apple iPhone 11 Pro Max | 0 | 15.00 % discount | | |
| All Products | 0 | 0.00 % discount and 0.0 surcharge | | |
| Add a line | | | | |

10. Now in “Apply on” section select “Product”
11. Now in “Product” section select the product you want to add discount.
12. In “Compute Price” section select “Percentage” and add your percentage in Percentage Price and click “Save & Close”

Product: Apple iPhone 11 (64GB) - Black

Apply On

- All Products
- Product Category
- Product
- Product Variant

Product

Apple iPhone 11 (64GB) - Black

Price Computation

Compute Price

- Fixed Price
- Percentage (discount)
- Formula

Percentage Price

20.00 %

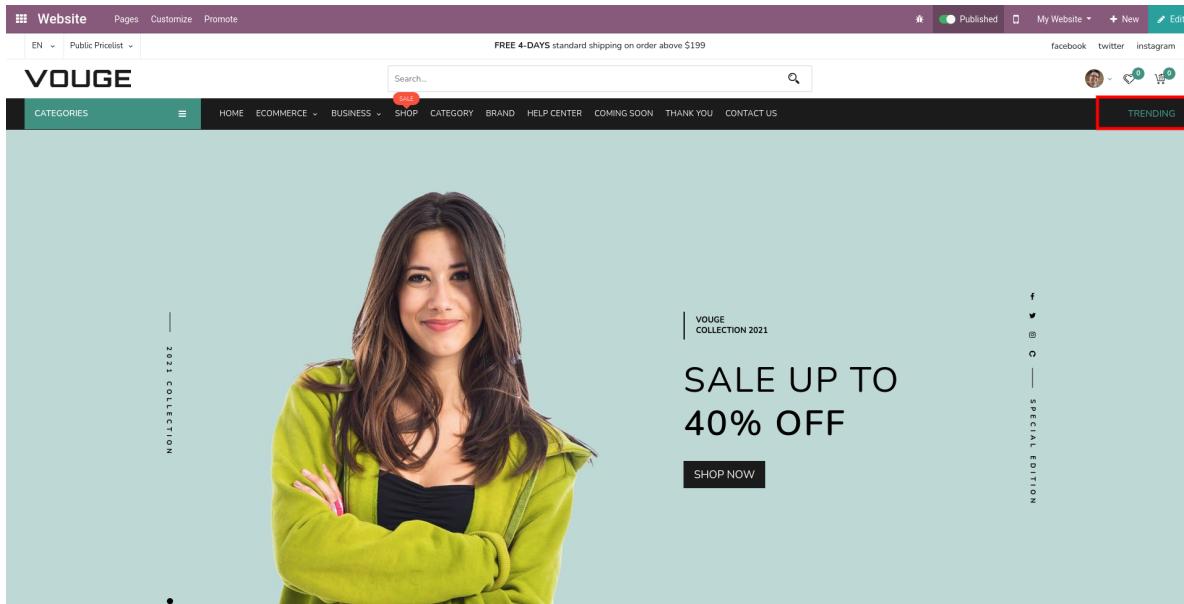

13. Now go to “configuration” tab and select “Show public price & discount to the customer” and click on “Save”

The screenshot shows the 'Public Pricelist' configuration page. The 'Website' tab is active. In the 'Website' section, the 'Auto Assign Category' checkbox is checked. In the 'Discounts' section, the 'Show public price & discount to the customer' checkbox is checked.

14. You can add More products like this if you want.

15. Now this category will be visible on header

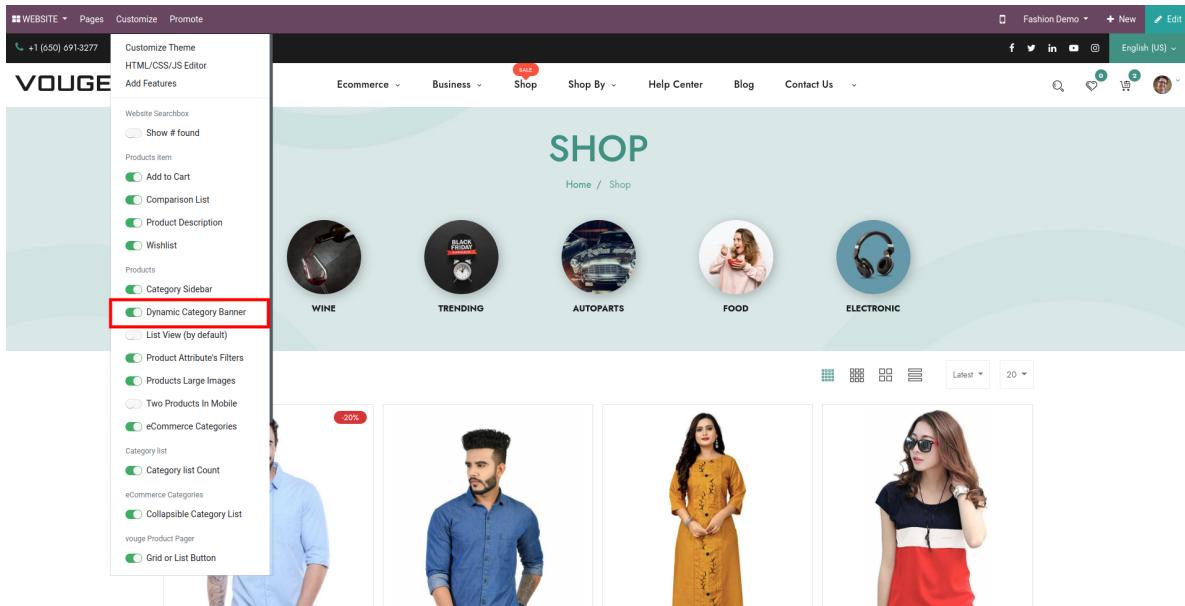

Note: Position of this category will be different in different header styles and also this product will only be visible in this category for applied pricelist only

Shop Page Customize Options

Dynamic Category Banner

Enable “Dynamic Category Banner” option for Dynamic Category Banner on shop page.

1. Go to Website -> Configuration -> Setting

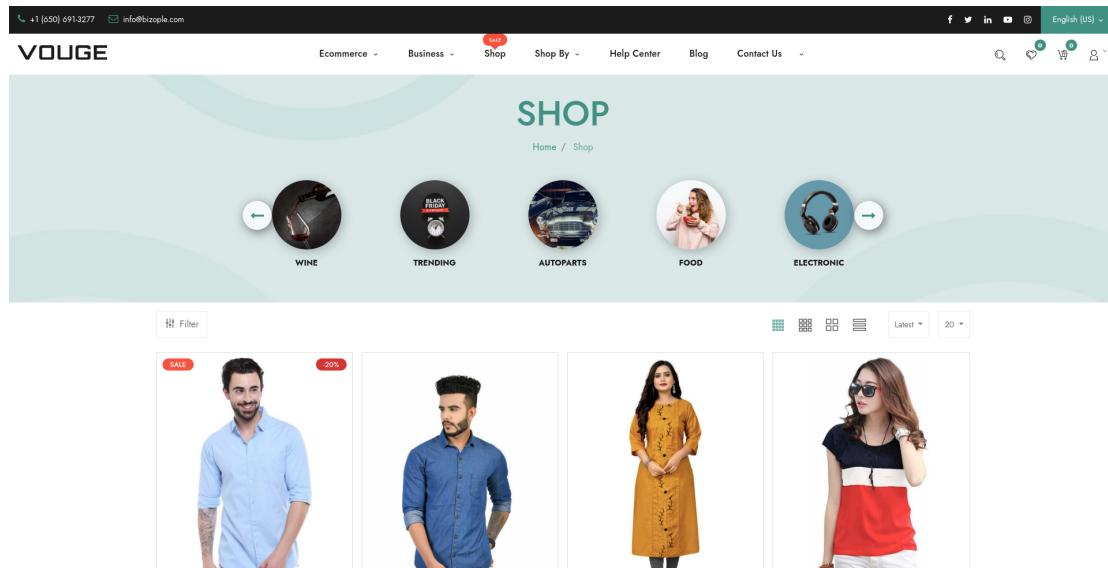

The screenshot shows the Odoo website configuration settings. The left sidebar has a 'Website' icon highlighted with a red box. The main menu bar includes 'Website', 'Dashboard', 'Orders', 'Products', 'Blogs', 'Visitors', 'Reporting', 'Configuration', 'Bizople Theme Configuration', and a user profile. A dropdown menu from the 'Configuration' button is open, showing 'Settings' highlighted with a red box. The right side of the screen shows a 'Select the Website to Configure' section with 'My Website' selected. Below it is a 'Website' section where 'My Website' is named and a domain is listed. A sidebar on the right lists various website-related modules like 'eCommerce', 'Payment Acquirers', and 'Customer Account'.

2. Now add “Shop Page Banner Image” and click on “Save”

The screenshot shows the Odoo website configuration settings again. The left sidebar has a 'Website' icon highlighted with a red box. The main menu bar and configuration dropdown are the same as the previous screenshot. The right side shows the 'Settings' section with a 'Shop Page Banner Image' field containing a placeholder image. Below it is a 'Features' section with checkboxes for 'Multi-Website', 'Link Trackers', 'Google Maps', and 'Transparent Header Logo'.

3. Now you will see banner on the shop page.

4. Also you can see category on banner. (**For good visibility add the square image for that category**)

Brands

Enable Brands filter for product. But first you need to add brands. To do so follow the steps below

1. Go to website -> Bizople Theme Configuration -> Product Brand

The screenshot shows the 'Bizople Theme Configuration' section of the website. A dropdown menu is open under 'Product Brand' with options: Product Slider, Multi Tab Product Slider, Category Slider, Blog Slider, Product Brand (highlighted with a red box), Product Tabs, and Product Label.

2. Click on "Create"

3. Now set name of the brand , brand description (for better visibility in product page), brand image and sequence (optional if you want to give any priority for top visibility else it will take by it self) and click "save"

The screenshot shows the 'Product Brand / New' creation form. The 'Name' field is filled with 'Highlander'. The 'Description' field contains placeholder text: 'Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.'. The 'Image' field displays a thumbnail of the 'HIGHLANDER' logo. The 'Sequence' field is set to '1'. The 'Visible in Snippet' field is set to '2'.

4. Now Go to Website -> Products -> Products

The screenshot shows the 'Products' section of the website. A dropdown menu is open under 'Products' with options: Product Variants, Pricelists, Product Services, and Product Highlights. The 'Analytics' button is highlighted with a red box. The 'GO TO WEBSITE' button is also visible. The main area displays a line chart showing sales trends from 02/18/2017 to 02/23/2017. It also shows summary statistics: 8 Orders, \$7,201.18 Sold, 1.14 Orders/Day, \$900.15 Average Order, 12 Carts, and 66.67% Conversion. A table titled 'BEST SELLERS' lists products: iPad Retina Display (5 units, \$2,697.00), iMac (4 units, \$5,946.00), and iPad Mini (1 unit, \$599.00).

5. Select the Product you want to add brand to it.

6. Now click “Edit”

7. Select Brand For that product and click “Save”

8. Now you will see the Brands Filter in shop page

Product Label

1. Go to website -> Bizople Theme Configuration -> Product Label

The screenshot shows the Bizople Theme Configuration interface. In the top right corner, there's a user profile for 'Mitchell Admin'. Below it, a dropdown menu is open, showing options like 'Product Slider', 'Multi Tab Product Slider', 'Category Slider', 'Blog Slider', 'Product Brand', 'Product Tabs', and 'Product Label'. The 'Product Label' option is highlighted with a red box. To the right of the menu, there are sections for 'MY WEBSITE 2', 'LAST WEEK', 'LAST MONTH', and 'LAST YEAR'. Below the menu, there's a chart titled 'SALES SINCE LAST WEEK' showing sales trends over time. To the right of the chart, there are summary statistics: 8 Orders, 1.14 Orders/Day, \$7,201.18 Sold, \$900.15 Average Order, and 66.67% Conversion. A section titled 'BEST SELLERS' lists products like iPad Retina Display, iMac, and iPad Mini with their respective quantities and sold amounts.

2. Click on “Create”

3. Set the name of the label, Background color, font color and style and click “Save”

The screenshot shows the 'Product Label / Sale' configuration page. At the top, there are 'SAVE' and 'DISCARD' buttons. Below them is a form with the following fields: 'Name' (set to 'Sale'), 'Label Background Color' (set to red), 'Label Font Color' (set to white), and 'Label Style' (set to 'Rounded'). A note at the bottom says 'Note: For Outline Styles Background color work as Border Color'. There are also 'SAVE' and 'DISCARD' buttons at the bottom of the form.

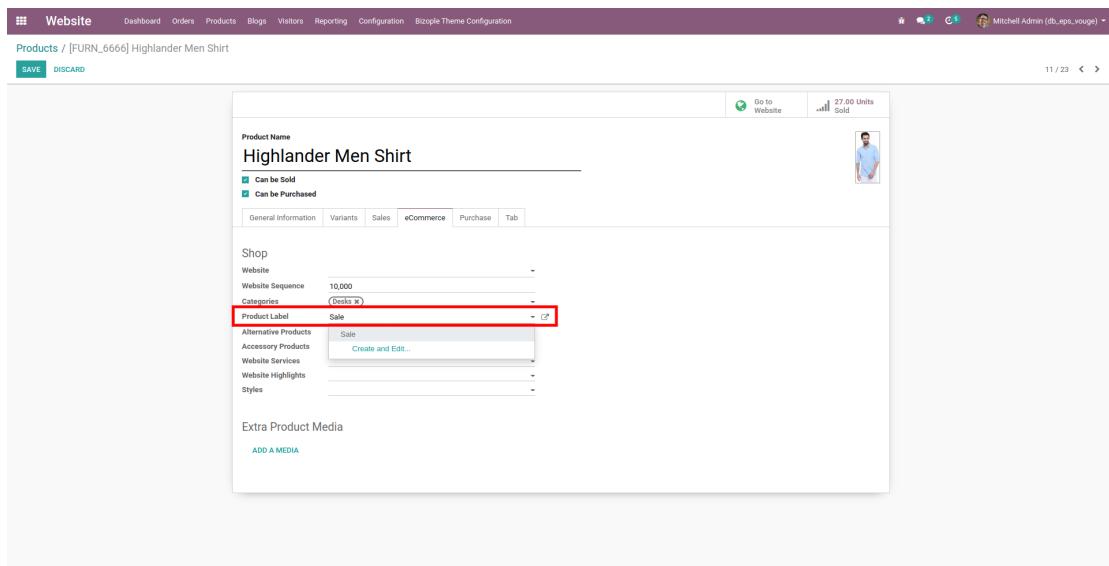

4. Now Go to Website -> Products -> Products

The screenshot shows the website dashboard. The top navigation bar has a 'Website' icon and the word 'Website'. Below it, there are tabs for 'Dashboard', 'Orders', 'Products', 'Blogs', 'Visitors', 'Reporting', 'Configuration', and 'Bizople Theme Configuration'. The 'Products' tab is highlighted with a red box. To the right of the tabs, there are sections for 'Analytics', 'SALES SINCE LAST WEEK', and 'BEST SELLERS'. The 'SALES SINCE LAST WEEK' chart shows sales trends over time. To the right of the chart, there are summary statistics: 8 Orders, 1.14 Orders/Day, \$7,201.18 Sold, \$900.15 Average Order, and 66.67% Conversion. A section titled 'BEST SELLERS' lists products like iPad Retina Display, iMac, and iPad Mini with their respective quantities and sold amounts.

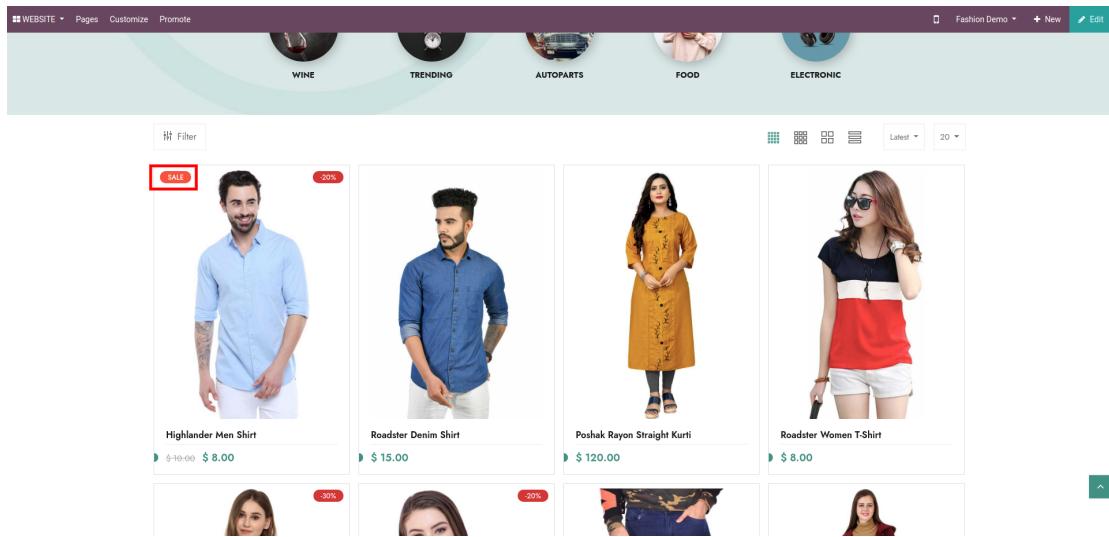

5. Select the Product you want to add Product Label to it.

6. Now click “Edit” and Go to “eCommerce tab”

7. Now select the Product Label and click “Save”

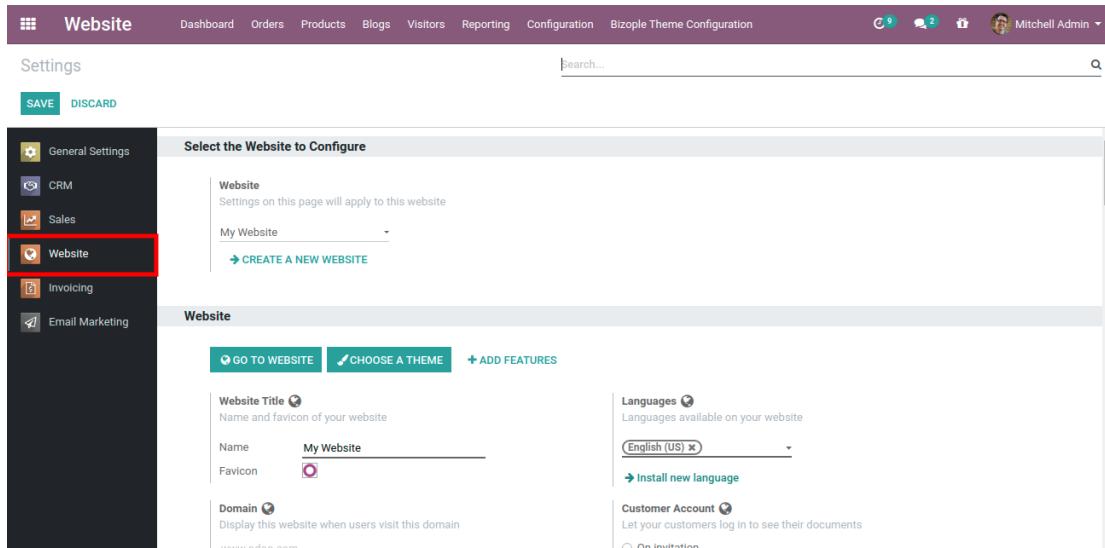

8. Now you will see your label on that product in shop page

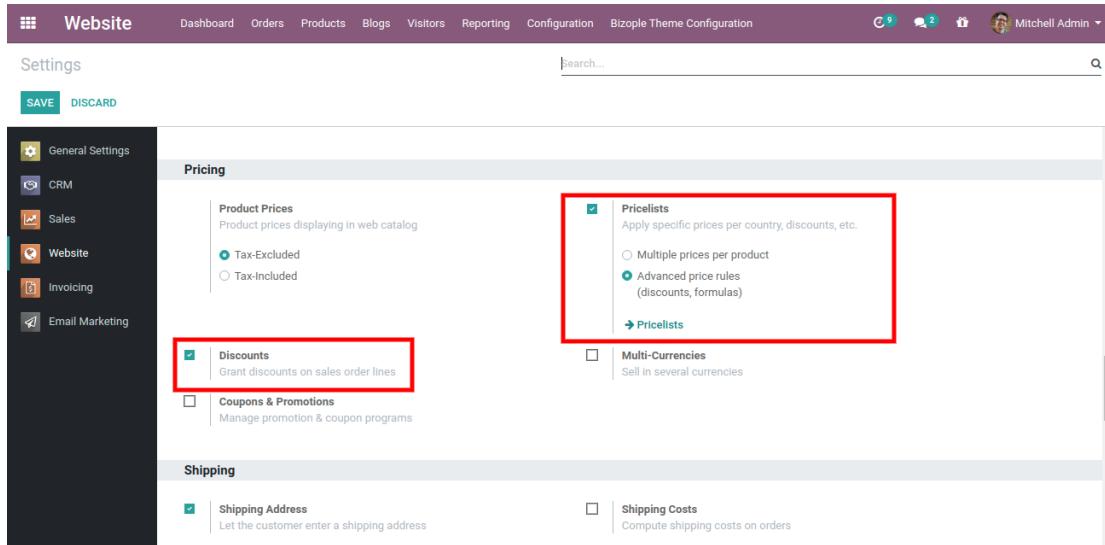

Discount Label & Discounted Price

For this you need to add the discount to a product

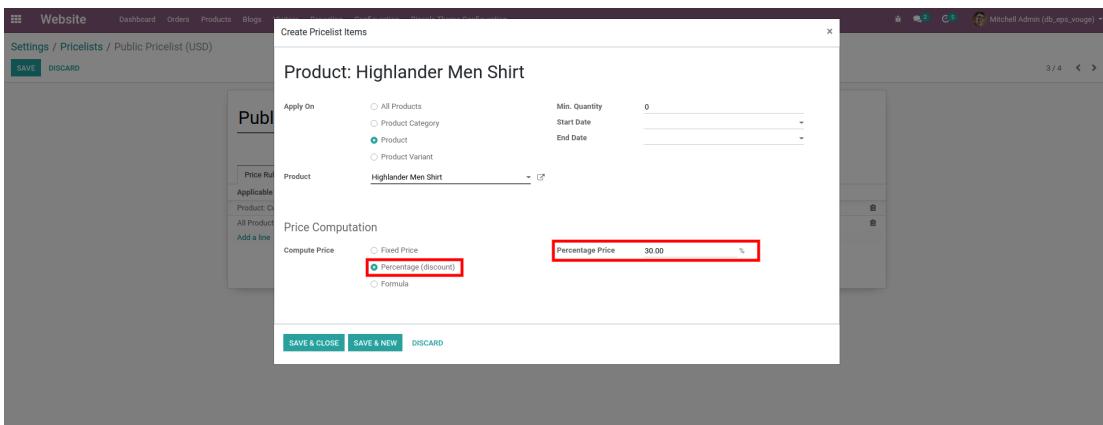

1. Go to setting -> website

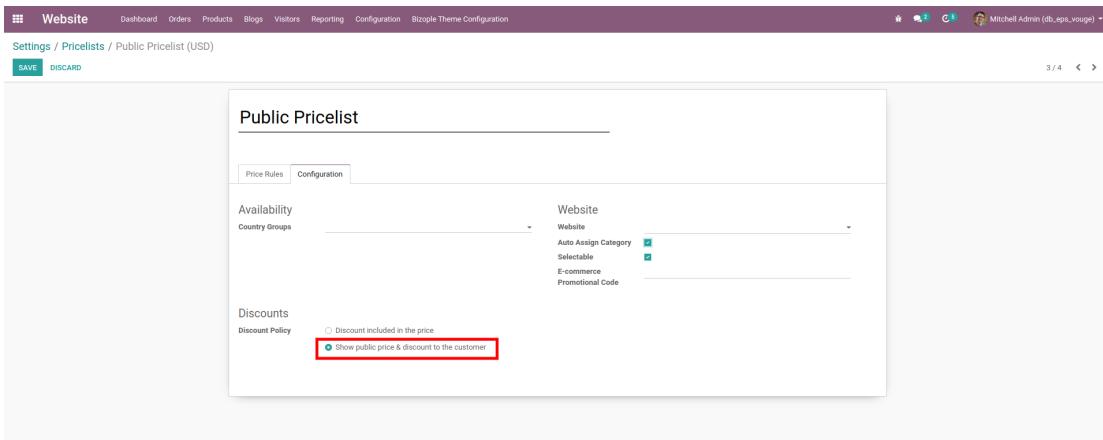

2. In pricing section enable “Discounts” and enable “Pricelist” and select “Advanced price rules” and save it.

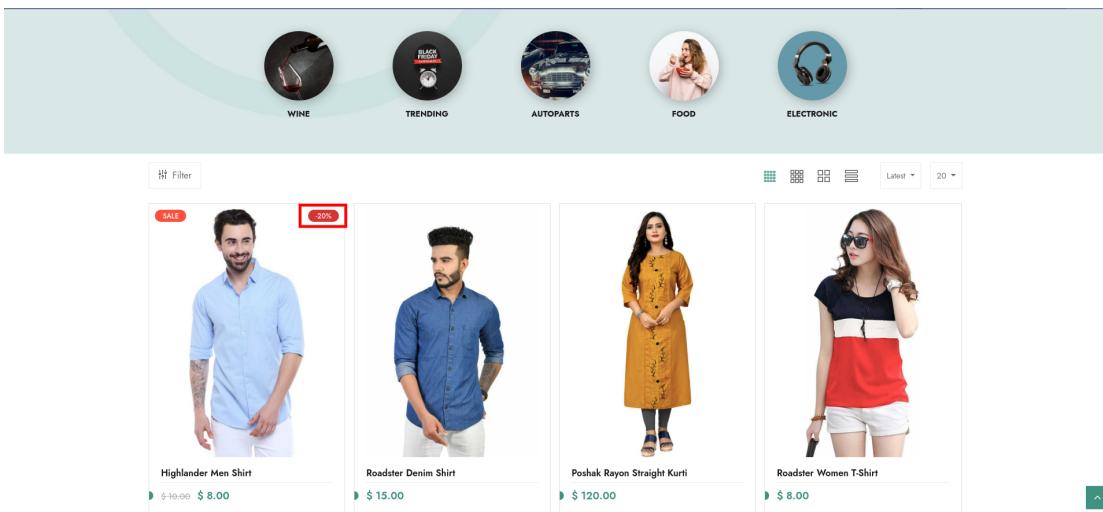

3. Again go to pricing section and click on “Pricelists”
4. Now Select your pricelist and click on “Edit”
5. Now Click on “Add a line”
6. Now in “Apply on” section select “Product”
7. Now in “Product” section select the product you want to add discount.
8. In “Compute Price” section select “Percentage” and add your percentage in Percentage Price and click “Save & Close”

- Now go to "configuration" tab and select "Show public price & discount to the customer" and click on "Save"

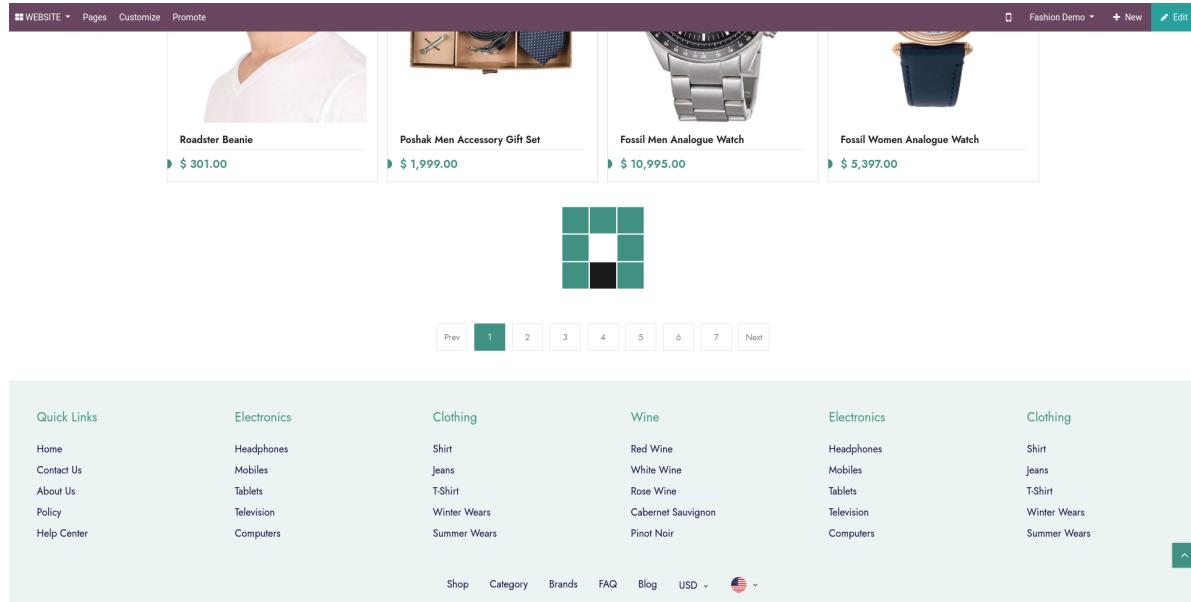

- Now go to shop page and you will see the discount label and discounted price applied to the product.

infinite product load

Once you are at the bottom of the shop page and you reach the product limit of that page , a loading gif will be appeared and after that next page images will be displayed

, i.e infinite products can be seen on the same page.

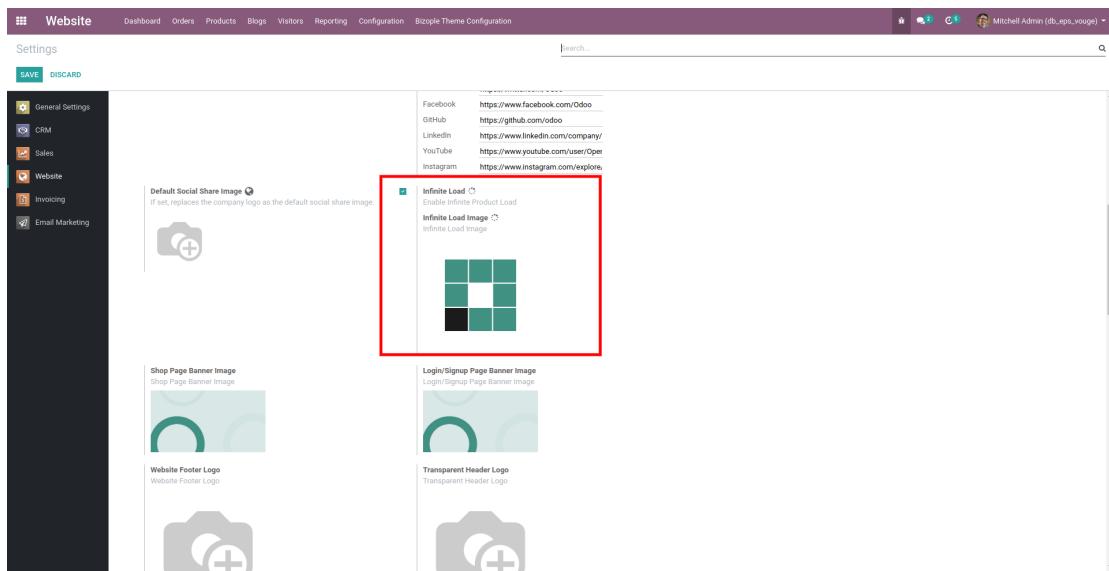

You can change the loading image or you can disable the infinite product load if you want. For that,

1. Go to Website -> Configuration -> Setting

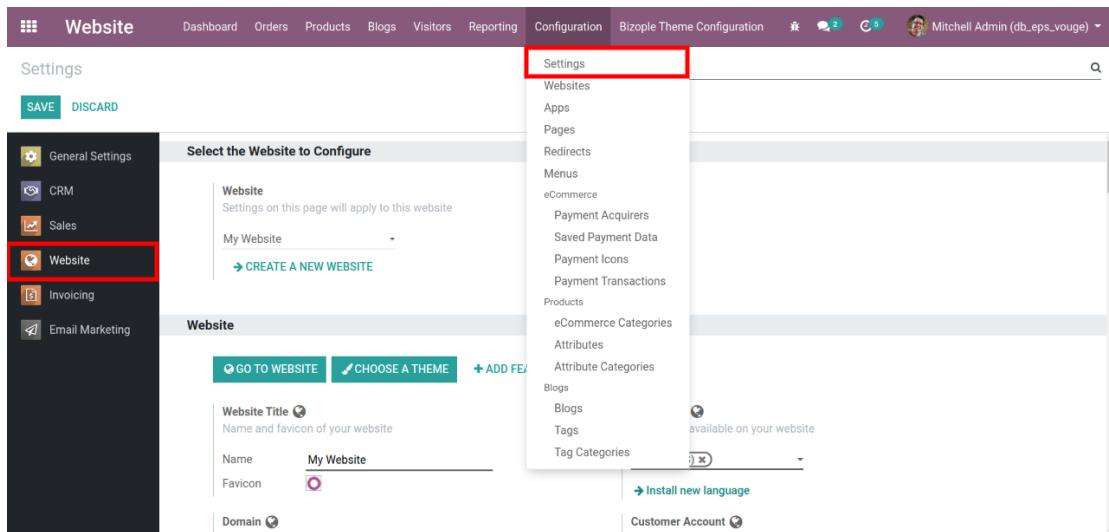

2. Now you can select the infinite load to enable or deselect it to disable it.

3. For image , you can change the image in “Infinite Load Image”.

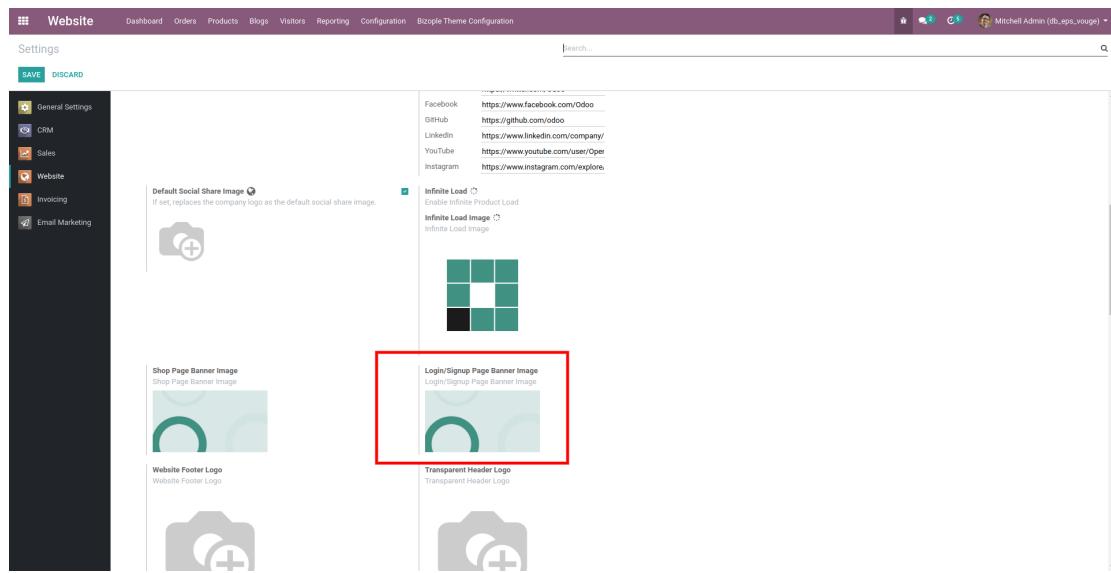

Login/Signup Page Banner

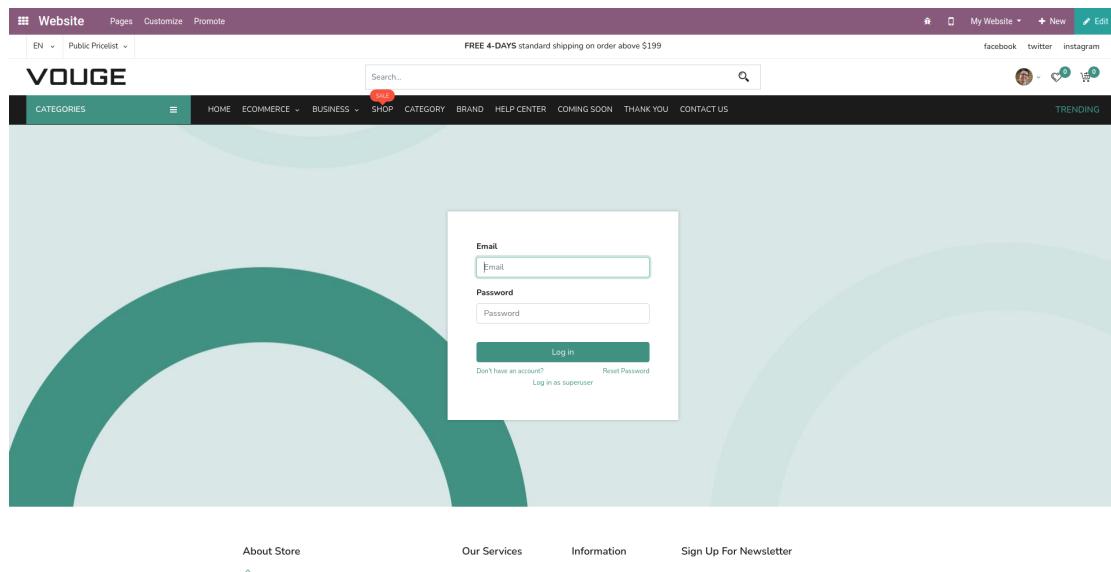

1. Go to Website -> Configuration -> Setting

2. Now add “Login/Signup Page Banner Image” and click on “Save”

3. Now you will see background image on Login/Signup page.

Website Footer Logo

1. Go to Website -> Configuration -> Setting

2. Now add “Footer Logo” and click on “Save”

3. Now you will see the logo on footer. (**Footer4, Footer5 and Footer8 have logo**)

Transparent Header Logo

1. Go to Website -> Configuration -> Setting

2. Now add “Transparent Header Logo” and click on “Save”

3. Now you will see the logo on transparent header. (**Header7 and Header8 has transparent header logo functionality.**)

Product page customize options

Alternative Products

This will add the alternative products for a particular product which are selected in backend.

The screenshot shows a product page for a men's shirt. On the left, a sidebar menu is open with various options like 'Automatic Image Zoom', 'Buy Now Button', and 'Image Zoom'. 8. Select the Tab you created and click "Save"
9. Now you will see the Tab added to the product's page.

The screenshot shows a website editor interface with a toolbar at the top. Below the toolbar is a main content area featuring a logo for 'Highlander' with a small description. There are four cards below the logo: 'WE SHIPPING WORLDWIDE', '100% MONEY BACK GUARANTEE', '100% SECURED PAYMENT', and '14-DAY RETURN POLICY'. At the bottom of the content area is a navigation bar with 'Description', 'Reviews', and 'Demo' buttons, where 'Demo' is highlighted with a red box.

Website PWA Configuration

1. Go to setting -> website

2. Now Enable PWA.

The screenshot shows the Odoo Website configuration interface. On the left sidebar, under the 'Website' tab, there is a 'General Settings' section with icons for CRM, Sales, Website, Invoicing, and Email Marketing. Below this is a 'Website PWA Configuration' section with a red box highlighting the 'Enable PWA' checkbox and its description 'Enable Progressive Web Application'. At the bottom of the configuration area, there are buttons for 'GO TO WEBSITE', 'PICK A THEME', and '+ ADD FEATURES'.

3. Fill all data of PWA configuration

The screenshot shows the Odoo Website configuration interface after filling in the PWA settings. The 'Enable PWA' checkbox is checked. The 'PWA Name' field contains 'Theme Vouge', 'Short Name' is 'Vouge', 'Description' is 'Vouge', and 'Start url' is '/'. Under 'Background Color', there are two green circular color swatches. Below these are two icons labeled 'PWA Icon 512' and 'PWA Icon 192', each displaying a stylized teal 'V' logo.

4. Now click "Save"

5. Now go to home page, you will get notification/suggestion to install the theme in both desktop and mobile.
